SUMMARY

AI-focused Computer Science undergraduate (B.Tech, 2026) with practical experience in LLM post-training, NLP, and deep learning. Improved model quality at Ethara.AI via RLHF, prompt engineering, and response evaluation, and has shipped full-stack and ML projects from development through deployment. Aiming to build and ship production AI systems as an AI Engineer..

EDUCATION

Kalinga Institute of Industrial Technology (KIIT) , Bhubaneswar	Sept 2022 – Sept 2026
B.Tech in Computer Science and Engineering	CGPA: 7.75

INTERNSHIP

LLM Post-Training Intern , Ethara.AI	Jan 2026 – May 2026
---	---------------------

- Led a team of 40 annotators, coordinating daily workflows and task allocation in collaboration with team leads to consistently meet quality and delivery targets.
- Contributed to post-training optimization of LLMs through data annotation, prompt engineering, and response evaluation — with a focus on reducing hallucinations, bias, and factual inconsistencies.

Vocational Intern , Steel Authority of India (SAIL)	Mar 2024 – Apr 2024
--	---------------------

- Analyzed large-scale trainee registration datasets to identify workflow inefficiencies, resulting in a **40%+** improvement in process accuracy.
- Documented system flows and collaborated with cross-functional teams to support more maintainable operational processes.

PROJECTS

Team-Task-Manager	Nexus
--------------------------	-------

- Designed project-scoped role-based access control (Admin/Member), where the same user holds different permissions per project — enforcing task and member-management restrictions at the API middleware layer.
- Developed a Kanban board and an aggregated analytics dashboard surfacing per-member workload, status breakdowns, and overdue-task alerts over a REST API with an Axios JWT interceptor.

BeJeweled – E-Commerce Jewellery Website	BeJeweled
---	-----------

- Delivered a fully functional, production-deployed e-commerce platform for a silver jewellery brand as a freelance engagement.
- Owned the full deployment pipeline — Vercel hosting, custom domain configuration, and automated CI/CD via GitHub Actions.
- Maintained codebase integrity through Git repository management, enforcing branching strategies and pull request reviews.

TECHNICAL SKILLS

- **Languages:** Python, Java, JavaScript, SQL
- **AI / ML:** scikit-learn, HuggingFace Transformers, RLHF, fine-tuning, NLP, prompt engineering, data annotation
- **Web & APIs:** HTML, CSS, React.js, TypeScript, Tailwind CSS, Flask, REST APIs
- **Databases & Tools:** MySQL, Git, Jupyter Notebook
- **Core CS:** Data Structures & Algorithms, OOP, DBMS, Operating Systems

CERTIFICATIONS

- **Foundations of Data Science** – Google (2025)
- **Generative AI** – IBM (2025)
- **Strategy and Game Theory** – IIM Ahmedabad (2025)
